

Vocabulary I need to know to be a scientist:

- dead, alive, never alive
- habitats
- nutrition
- food
- food chain
- source
- wild/farmed
- prepared
- healthy
- balanced
- exercise

- Animals need food to survive.
- A food chain shows who eats what.
- All animals need food, water and air to survive.
- To be healthy, it is important to have good hygiene habits.
- Healthier food choices and physical activity help us to be healthier!

The Food Chain Of An Owl

Engineer

We will make a healthy wrap. Our ingredients might be lettuce, tomatoes, herbs, cucumber, peppers, cheese, ham and tuna.

We might use knives, vegetable peelers and graters.

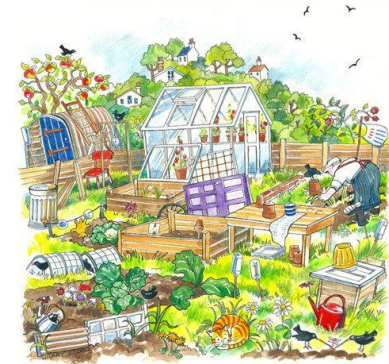

We will learn about Giuseppe Arcimboldo...

What knowledge do I already have?

- I can name common fruits and vegetables.
- I can suggest where food comes from and how it is grown.
- I can mix colours and use tone.

Artist

- We will use colour, pattern, texture, line, shape, form and space to make images of fruits and vegetables.
