

Why is water pollution a problem?

Scientist:

I can identify the different things that pollute our local area
I can classify items in the local environment

Geographer:

I can classify living things in their habitats.

Scientist:

I can explain how humans' impact different habitats.

Engineer:

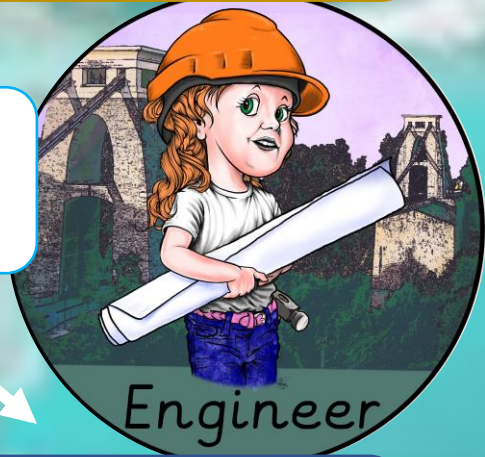

I can classify and evaluate household items
I can design and create a product to help the environment.

Scientist:

I can explain how our oceans are polluted.

Geographer:

I can create a manifesto

Author:

I can explain how pollution affects our environment.

How do we know what we are doing to the environment?

Why does the ocean matter?

Who is responsible?
